Automate any browser, from any language.
Selenium is a browser automation tool that gives you full control over Chrome, Firefox, Edge and Safari. Write your scripts in Java, Python, C#, Ruby, JavaScript or Kotlin using the official W3C WebDriver standard.
GET STARTED
USING AI AGENTS
Works out of the box: Selenium downloads what it needs to talk to your browser, so there is nothing to install by hand.
Install Selenium and run your first script
Add the Selenium package for your language, then run the script below. It opens Chrome, loads a page and closes the browser again.
Java
Python
CSharp
Ruby
JavaScript
Kotlin
Add org.seleniumhq.selenium:selenium-java to your build, then run:
package dev.selenium.hello;
